PRINCIPAL’S MESSAGE

Annual General Meeting of School Council

This meeting will be held on Monday 4th May. It is a School Council meeting, but one that we invite all parents to attend. The school’s Annual Report and the financial reports for 2014 shall be tabled. We hope to see you there, in the staff room to hear a little more about the schools performance during 2014, as well as learning about our School Review to be undertaken this year.

Please note that there has been a change in the dates classes will make their presentations at our assemblies:

Friday 1st May - Group 4
Friday 8th May - Group 10
Friday 15th May - Group 1
Friday 22nd May - Group 8
Friday 29th May - Group 2
Friday 5th June - Group 11
Friday 12th June - Group 5
Friday 19th June - Group 3

REMEMBER ALSO: Assemblies start at 9.05am. Hope to see you there.

Be careful what you wish for as a parent! by Michael Grose - Australia’s No 1 parenting educator

The focus on success and achievement doesn’t have to come at the expense of our children’s empathy and wellbeing.

What would you wish for? A caring child or a successful child?
If pressed to choose, which would you prefer?
If you were like the parents of kids in a recent study you’d go for successful rather than caring.
In a fascinating Harvard study referred to in a recent Age article, 10,000 kids were asked whether achievement and success, rather than caring for others, were their parents’ main priorities. The kids overwhelmingly said their parents opted for success rather than caring.

I suspect Australian kids would come up with a similar response if asked. In my work with parents and schools over nearly 40 years I’ve never seen the educational and parenting landscape so competitive as it is today. The standard belief of ‘Everyone can get ahead and be successful’ has been replaced by ‘my child needs to get ahead and be successful.’ Parents rightfully will go to great lengths to make sure their kids don’t get left behind, but now academic success increasingly means achieving at any cost. Even at the expense of a child’s well-being, and in extreme cases, at the expense of other children’s success.

This is very different from even a generation ago when caring and respect for others was drummed into kids. “Do the right thing by others”; “Respect your elders”; “Take good care of each other” were common mantras that many of today’s parents grew up hearing. Now that these kids have become parents themselves they use achievement mantras rather than the empathetic statements they were raised on. “Always do your best”; “Think confident thoughts”; “Set your goals and work hard to achieve them” are typical of the comments that kids hear in today’s more competitive environment.

Washington Post parenting writer Ashley Trexler argues that putting happiness and success before caring and empathy is raising a generation of bullies. She claims that parents unknowingly encourage bullying through their focus on success at all costs, as kids are being encouraged to pursue power at the expense of empathetic behaviour.

This is a controversial view based on the assumption that you can have either successful kids or caring kids. I believe you can have both. Parents and teachers can encourage kids to achieve, but also emphasise the importance of looking out for your mates, and taking care of others. Individual success doesn’t have to come at the expense of well-being and the success of others. It does mean that we need to put caring for others firmly on our parenting agendas. Here are five ways to do this:

1. Develop a language for caring

Parents invariably develop a deep language around the things they value. If caring is important then you need to develop language for caring (look after your brother; do the right thing; do unto others) just as you have probably developed a language around success (persist, work hard, do your best).

2. Model caring behaviours

Parents need to model caring, relational behaviours if they want children to develop these behaviours. Positive displays of intimacy such as a kiss and a hug for every family member as they walk out the door each day is a great way to teach healthy caring behaviours. It’s the small acts of kindness and caring that happen on a consistent basis that has the most lasting impact on kids.
3. Focus on co-operation rather than competition
It’s easy to develop competition between kids. As a parent all you need to do is praise one child and criticise another and you’ve established the conditions for competition. It’s far harder to develop cooperative behaviours, but it’s worth the effort. Encourage kids to help each other; ask them to do jobs in pairs so they learn to work together; and teach older children to give way to younger children rather than always have their own way. Caring kids learn that not everything goes their way and that they need to compromise and give way to others in the name of being social and getting on.

4. Encourage nurturing behaviours
In the past families were larger than today and they had a natural advantage in developing caring and empathy. Elder kids would invariably have to look out for, or look after younger siblings, often at the expense of their own interests. In an era of small families kids have fewer natural opportunities to look after each other. However parents can develop nurturance by encouraging children to look out for younger friends and relatives; to care for pets and also to be respectful of older relatives and friends.

5. Pay attention to children’s emotions
Now more than ever it’s important for parents to be attentive to children’s emotional lives, and also to develop an awareness of their own feelings and the feelings of others. Empathetic kids rarely use power and bullying to get their own way. Empathy always starts with an awareness of a child’s own emotional state.

As parents we want our kids to grow up to be successful and achieve their full potential. It’s the default position for most parents. But that doesn’t have to come at the expense of caring for others. In these times of small families and a more competitive landscape parents need to work harder than ever to develop nurturance, caring and respect for others in kids.

Somers Camp
Many of our past and present students have attended Somers Camp over a number of years. This camp is for Students in years 5 and 6, and we are able to take up some positions at this camp every second year.

Now the Somers Camp has made the following announcement:

Woorabinda at Yallourn North is a campus of Somers School Camp
We are excited to announce that there will be an additional opportunity for school networks to participate in a high quality but low cost residential outdoor experience for primary students in Years 4 & 5 - $185.00 per student - includes transport and catering - 80 students per network - 4 or 5 staff per network - 5 day program - administered from "Woorabinda" - top value!

The Woorabinda experience will complement the nine day Somers Campus program for Year 5 & 6 students which is currently offered to schools in alternate years.

For decades now the demand for the Somers Camp program has steadily increased with the need to provide more student places highly evident in the ratio between places allocated and students missing out. Until now we have been without the resources with which to implement change.

However the addition of a campus at Woorabinda has expanded the possibilities significantly.

I believe we have been allocated places in September (Monday 7th - Friday 11th) so would appreciate early expressions of interest from families with students in Year 4 and 5.

Just respond in a quick note please, so I have an idea of the numbers who are keen.

Newsletters:
If you are still experiencing difficulty in opening the link we send you, my advice is to go directly to our website and you will find the newsletters (and lots of other interesting things) there. www.reservoirps.vic.edu.au

Helen Miller
Principal
Medical staff have alerted the community that there has been an increase in the number of cases of measles this year: so I think this information is timely:

Measles is a contagious viral illness that causes a skin rash and fever. Serious and sometimes fatal complications include pneumonia and encephalitis (brain inflammation). Measles is also known as rubeola, not to be confused with rubella (German measles). Worldwide, measles is the fifth highest cause of illness and death in children. Measles is rare in Australia because of the widespread use of the measles vaccine. It is important to continue immunising children in Australia, because there is a risk that the infection can be brought in by people arriving or returning from overseas.

Symptoms of measles
The signs and symptoms of measles may include:
• fever
• general discomfort, illness or lack of wellbeing (malaise)
• runny nose
• dry cough
• sore and red eyes (conjunctivitis)
• red and bluish spots inside the mouth (Koplik’s spots)
• red and blotchy skin rash that appears first on the face and hairline, and then spreads to the body.

Complications of measles
Possible complications of measles include:
• otitis media – inflammation of the middle ear
• diarrhoea and vomiting – may cause further complications such as dehydration
• respiratory infections – such as bronchitis, croup or laryngitis
• pneumonia – a type of lung inflammation that causes about 60 per cent of measles deaths
• pregnancy problems – if a pregnant woman contracts measles, she risks miscarriage or premature labour
• encephalitis – or brain inflammation, affects about one person with measles in every 1000.
• subacute sclerosing panencephalitis (SSPE) – occurs in about one in every 100,000 cases of measles. SSPE is an extremely rare progressive inflammation of the brain that causes loss of personality and intellectual problems. SSPE usually begins about seven years after the measles infection.

Causes of measles
Measles is most commonly spread when someone swallows or inhales the cough or sneeze droplets from an infected person. The measles viruses are carried inside mucus or saliva droplets and remain alive for several hours. Infection can also occur if someone touches contaminated surfaces or objects and then touches their own mouth or nose or eats before washing their hands. Symptoms usually occur about 10 to 12 days after infection. Measles is very contagious. Estimates suggest that a person with measles will infect about nine in every 10 people they have contact with who have not been immunised or previously infected with measles.

Immunisation against measles
Immunisation is the best protection against measles. A person who receives the recommended two doses of a measles vaccine has 99 per cent immunity against measles infection. If you have been infected with measles, you will usually have lifelong immunity.
Protection against measles is available under the National Immunisation Program Schedule. In Victoria, immunisation against measles is free of charge for:
• Children at 12 months – the first dose of measles vaccine is given as the MMR combination vaccine.
• Children at 18 months of age – the second dose of measles vaccine is given as the MMRV combination vaccine.
• Children at four years of age – the second dose of measles vaccine can also be given as the MMR vaccine, if the child was not given the second dose (in MMRV) at 18 months of age.
• Children up to and including nine years – catch-up immunisations are available for children not been fully immunised.
• Women planning pregnancy or after the birth of their child – two doses of MMR are available for women who have low immunity or no immunity to rubella.
The MMRV vaccine is not recommended for people aged 14 years and over.

Speak to your doctor, if you need more information.

*Birthday Greetings* to the following students who are celebrating a birthday in the next two weeks:

*Nijen, Keith, Amy, Annelise, Madeleine, Seechu, Adem R., Amber, Olivia and Josh I.*

---

**Student Awards**

Congratulations to the following students who were presented with *Student of the Week* awards at Assembly on the 17th April 2015.

*The You Can Do It* award was presented to *Group 7* For demonstrating excellent organisational skills with our morning procedure. Well done.

Congratulations to the following students who were presented with *Student of the Week* awards at Assembly on the 24th April 2015.

*The You Can Do It* award was presented to *Group 6* For working cooperatively to ensure our morning routine runs smoothly.

**Encouragement Awards will now be presented in class on Mondays by the class teacher. Student of the Week and Music/Specialist Awards will be presented at Assembly on Fridays.**
This Friday in Interschool sport we will be playing against Kingsbury Primary School. Netball and Tee-Ball will be played at Kingsbury Primary School and Football and Soccer will be played at Donath Reserve.

Last Week’s Results:

Football: Wow, I can’t believe our football season has finally started! When we arrived we were extremely nervous when we saw the other team! When the first quarter started all of our players were surprised we kicked 3 goals and the other team scored nothing. However at the end of the second quarter we were down by 7 points. In the third quarter we kicked a few goals but unfortunately at the end of the third quarter we were down by 20 points. We challenged them a lot towards the end of the match. The scores were 37 to 45. We lost by 8 points. Even though we lost we had a great time.

Soccer: Wow! Beautiful weather; pitch amazing. It was time to start with Sweeney opening the scoring with a goal. Then another goal was added by Samuel. Four goals were blasted in by Josh; one from the corner. Sweeney and Farouk added to our already really good score. The end results were 9-0. We won. Our goal scorers were: Sweeney 2, Josh 4, Samuel 1, Pavlos 1 and Farouk 1.

Teeball: What a fantastic day to play teeball. We were playing against Reservoir East. The sun was shining and we were ready. We won the toss and decided to field. They had some really good hitters, but sadly we were not really warmed up and it was not our best fielding. When we got warmed up we were on fire, getting home runs and getting outs. The scores were Reservoir East 29 and Reservoir 23. We lost but we had fun and learnt lots.

Performing Arts

The ‘Angklung’ instrument was introduced to our many senior students. They were able to play the instrument and share its music and the making of it.

Angklung with eight pitches

The angklung is a musical instrument made of two to four bamboo tubes attached to a bamboo frame. The tubes are carved to have a resonant pitch when struck and are tuned to octaves. The base of the frame is held in one hand, whilst the other hand strikes the instrument. This causes a repeating note to sound. Each of three or more performers in an angklung ensemble play just one note or more, but altogether complete melodies are produced.
The angklung is popular throughout Southeast Asia but it originated in what is now West Java and Banten provinces in Indonesia and has been played by the Sundanese for many centuries. Angklung and its music has become the cultural identity of Sundanese communities in West Java and Banten.

On November 18, 2010, UNESCO officially recognized Indonesian angklung as a Masterpiece of Oral and Intangible Heritage of Humanity and encourage Indonesian people and government to safeguard, transmit, promote performances and to encourage the craftsmanship of angklung making. You can also watch and listen to some angklung music by logging onto Youtube:

‘Titanic’ with angklung instrument
‘We are the champions’ Bandung Java
‘Umbrella’ by Rihanna/ Angklung/ Bamboo version

We would like to thank Sweeney and his family for kindly allowing us to exhibit and play their musical instrument.

Thanking you
Maria Phokos

Ride2School Program
Date: Thursday 30th April 2015

Make our day count in April
Let's continue to develop a healthy active travel culture and gain good results this month. Our Hands Up survey will take place for the month of April this Thursday the 30th April 2015. We would like to encourage as many students as we can to walk or ride to school. Riding your skateboard or scooter is also allowed. Don’t forget to wear your helmet! This is a great way to keep physically active on your journey to school. Parents you can join forces and kick start a healthy habit by walking or riding to school together. Have fun everybody and make Thursday an active morning, ready for the count.

Thank you
Maria Phokos and the Young Leaders/Junior school Councillors.

THE CHILDREN’S BOOK COUNCIL OF AUSTRALIA BOOK OF THE YEAR AWARDS
THE 2015 SHORT LIST

Book of the Year: Older Readers
NB: These books are for mature readers

Atkins, Clare Nona & Me, Black Inc.
Bongers, Christine Intruder Random House Australia
Groth, Darren Are You Seeing Me? Random House Australia
Keil, Melissa The Incredible Adventures of Cinnamon Girl, Hardie Grant Egmont
Sweeney, Diana The Minnow, Text Publishing
Zorn, Claire The Protected, University of Queensland Press
